**FOR IMMEDIATE RELEASE**

## **UC VENTURE LAB FUNDS TELESMAART HEALTH TO EXPAND CARE ACCESS TO ORGAN TRANSPLANT AND CARDIOLOGY PATIENTS**

*Enterprise Telehealth Platform Set to Revolutionize Access to Care and Enable Comprehensive Virtual Patient Examinations at Home, Nursing Homes, Retail Clinics...or Almost Anywhere*

**LOS ANGELES, CALIF. (July 1, 2021)** – The enterprise telehealth platform, TeleSMART Health, has received investment funding from The University of Cincinnati Venture Lab. The funding will enable TeleSMART to develop its enterprise platform to expand access to care for organ transplant and cardiology patients in clinical trials at UC Health. The vision of TeleSMART is to expand the population of resource-constrained patients able to receive lifesaving procedures.

Currently, patients with resource constraints are often unable to comply with doctor-prescribed treatment protocols and are deemed unsuitable to receive lifesaving procedures. The TeleSMART platform is designed to enable patients to overcome many of their resource constraints and allow them access to the procedures that can improve and extend their lives.

The TeleSMART platform has three major components: Patient Kit, Clinician App and Web Portal. The patient kit consists of a tablet with a pre-installed TeleSMART app and connected peripheral devices enclosed in a protective case. The TeleSMART Clinician App and Web Portal mimic in-office visits applications and allow doctors to examine patients, integrate data into the EHR, and maintain continuity of care.

Tchad Robinson, CEO of TeleSMART says, “The platform allows doctors the comfort of maintaining the in-office procedures they are used to and the convenience of examining patients virtually.”

TeleSMART Health is an enterprise telehealth platform that enables clinicians to perform remote comprehensive physical examinations with patients during virtual visits.

UC’s Venture Lab accelerates and simplifies the process of creating a new company from scratch. As any entrepreneur knows, you can’t do it alone. The Venture Lab connects university students, faculty, staff, and alumni to talent and funding to help launch new companies.
